OGUNKANMI TAIWO EMMANUEL

Computer Science Student – Aspiring Full-Stack Software Engineer

damilareogunkanmi19@gmail.com | 09016104193 | EDTpy | OJO Lagos State, Nigeria.

Computer Science student at Lagos State University with a strong passion for full-stack software development, backend systems, and automation. With over 1,000 hours of hands-on coding experience through intensive bootcamps and personal projects, I have built and deployed real-world applications using Python, Node.js, React.js, and modern web technologies.

I am actively seeking a SIWES / internship opportunity where I can contribute meaningfully to production software, deepen my full-stack expertise across both frontend and backend disciplines, and grow under the guidance of experienced engineers. I thrive in collaborative environments, bring disciplined analytical thinking to every problem, and am driven by a genuine desire to keep learning and building.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, Java, Dart
Frontend: React.js, HTML5, CSS3, Responsive Web Design
Backend: Node.js, Express.js, RESTful API Design
Databases: PostgreSQL, MySQL
Mobile: Flutter (Dart)
Tools & Platforms: Git, GitHub, VS Code, System Automation
Currently Exploring: Full-Stack Architecture, CI/CD, Cloud Deployment

ACADEMIC AND APPLIED PROJECTS

Danfo Bus Scheduling System (Flutter Developer & Co-Researcher)
Tech Stack: Flutter, Dart, qr_flutter (QR Code Generation)
Designed a multi-platform digital conceptual model aimed at optimizing public transport scheduling in Lagos.

- Conducted research on transit patterns to inform the backend logic for route timing and bus intervals.
- Integrated QR code-based digital ticketing system using qr_flutter package
- Designed real-time booking system with seat allocation and route management
- Presented findings on how digital scheduling can reduce passenger wait times in high-traffic urban areas.

---

Football Predictive Analysis Application (Data Processing Developer)
Tech Stack: Python, Pandas
A data-driven Python application that analyses historical sports performance data to generate predictive match insights.

- Built end-to-end data processing pipelines to ingest, clean, and analyze match statistics and team performance trends.
- Implemented analytical models to identify patterns from historical data and generate match outcome predictions.
- Designed the system to handle frequent data updates and produce timely, actionable insight outputs.

RS Abimbola Enterprise ERP System (Full-Stack Developer) – In Development
Tech Stack: NestJS, Next.js 14, TypeScript, PostgreSQL, Prisma ORM, Paystack API, Zustand, Turborepo

A production-grade ERP and Fleet Management system for a WAMCO & Unilever distributor in Nigeria, digitalizing inventory management, customer ordering, and fleet dispatch operations.

- Architected a multi-role full-stack application (Admin, Warehouse, Driver, and Customer) with JWT authentication, token rotation, and role-based access control across a NestJS REST API and Next.js 14 frontend.
- Built a real-time inventory system managing 47 FMCG products with stock movement audit trails, low-stock alerts, and barcode scanning, alongside a customer ordering portal with integrated Paystack payment processing.
- Designed a normalized PostgreSQL schema with 18 tables using Prisma ORM, handling the full order lifecycle from placement and payment through warehouse processing to fleet dispatch and delivery confirmation.

EDUCATION

Bachelor of Science (B.Sc.) - Computer Science - Lagos State University (LASU), Lagos, Nigeria
Expected Graduation Year **2027**

Relevant Coursework:

- Software Engineering Principles
- Database Management Systems
- Computer Architecture and Organization
- Operating Systems
- Research Methodology

CERTIFICATIONS

Python Certification Level 1 – Teach Ours (Be-a Education Ltd) | ID: MUBKHY03
100 Days of Code: The Complete Python Pro Bootcamp – Dr. Angela Yu (App Brewery)
The Complete Full-Stack Web Development Bootcamp – Dr. Angela Yu (App Brewery)

LEADERSHIP AND ENGAGEMENT

Team Captain — Computer Science Department Football Club, LASU

- Lead and coordinate a 15-player competitive team through departmental tournaments.
- Responsible for strategy coordination, team morale, and player management
- Building the same organisational and leadership skills that translate directly into engineering team environments.

Tech Event Volunteer

- Volunteer at on-campus techn events and conferences to network with industry professionals and stay current on emerging trends in software engineering and tech.
